SUMMARY

Full Stack Engineer with **3+ years** of experience designing and shipping production systems end-to-end from serverless video pipelines on AWS to AI-enriched workflows and real-time scheduling engines. M.Tech (CSE) from MNNIT Allahabad with **350+ LeetCode** problems solved.

EXPERIENCE

Self-Employed | Full-Stack Developer | *Remote*

Sept 2025 – Present

- Built production-grade video streaming and clinic management platforms with end-to-end architecture: auth, scheduling engines, caching, and async workflows.
- Integrated WhatsApp API and OpenAI for real-time communication and AI-powered features; active open-source contributor.

SAP Labs | Graduate Research Engineer | *iXp Internship, M.Tech MNNIT Allahabad* | *Bangalore*

Aug 2024 – Jun 2025

- Identified **60+ bugs** across SAP Business Application Studio via functional and regression testing, with detailed defect reports to accelerate triage.
- Developed **30+ automated test scripts** and **50+ BAS applications**, converting manual test cases into repeatable validation pipelines.
- Validated HANA Vector Engine and database artifacts across **100+ test scenarios** with zero critical failures at production sign-off.

Nagarro | Full Stack Developer | *Gurgaon*

May 2021 – Sep 2023

- Reduced frontend TBT by **20%** using Angular OnPush strategy and reusable components, sustaining **60 FPS** under high data load.
- Built scalable backend services for a rail asset management system handling **170K+ assets** with sub-second real-time updates.
- Improved deployment speed by **15%** by standardizing CI/CD pipelines and Jasmine unit testing; authored team-reference API documentation.

PROJECTS

StreamSphere | *Angular, Node.js, AWS, MongoDB, Redis*

[Live] | [GitHub]

- Built a **serverless video pipeline** (S3 → Lambda → FFmpeg → HLS) with adaptive bitrate streams (360p/720p/1080p), cutting playback startup time by **40%**.
- Implemented **event-driven Redis caching** with Lambda webhooks, reducing feed latency by **30-40%** and S3 origin load by **25%**.
- Designed **cursor-based pagination** for infinite scroll with O(1) query performance and consistency under concurrent uploads.
- Built a fault-tolerant **AI enrichment pipeline** (Whisper, GPT, HuggingFace) with async orchestration and graceful degradation.

DentalConnect | *Next.js, PostgreSQL (Supabase), Vercel, WhatsApp API*

[Live] | [GitHub]

- Designed full-stack appointment platform with OTP-based WhatsApp auth, JWT role-based access, and a **dynamic scheduling engine** reconciling live bookings in real time.
- Built **async notification workflows** (OTP, reminders, cancellations) via WhatsApp Business API and Vercel Cron, with RLS, Zod validation, and OTP rate limiting.

Argument | *React, Node.js, Socket.io, MongoDB, Redis, OpenAI, Whisper*

[Live] | [GitHub]

- Engineered a **real-time debate platform** with Socket.io supporting room codes, alternate-turn and buzzer modes, and a host-controlled session lifecycle.
- Built a **live transcription pipeline** using Whisper API feeding transcripts into an OpenAI **scoring engine** that evaluates arguments and determines round outcomes.
- Designed a **gamification system** with XP progression, dynamic leaderboards, and badge unlocks; Redis-backed session tokens for low-latency room auth.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C++, Java, SQL

Core Concepts: Data Structures & Algorithms, System Design, OOP, Concurrency, Caching, Distributed System, REST APIs

Frontend: Angular, React, Next.js, HTML5/CSS3, Tailwind CSS

Backend: Node.js, Express, REST APIs, CI/CD, Docker, Git

AI/ML: OpenAI APIs, Whisper (ASR), HuggingFace Transformers, RAG, Vector Embeddings

Cloud & Databases: AWS (S3, Lambda, CloudFront), SAP BTP, SAP HANA, MongoDB, Redis, PostgreSQL

EDUCATION

Motilal Nehru National Institute of Technology Allahabad | M.Tech(CSE) | **CPI: 8.75/10**

Includes SAP Labs iXp internship (Aug 2024 – Jun 2025)

Aug 2023 – Aug 2025

Bundelkhand Institute of Engineering and Technology | B.Tech(CSE) | **78.6%**

Aug 2017 – Aug 2021
